

Andree-Ann Parent

Université du Québec à Montréal

Andrée-Anne Parent is currently pursuing a PhD in Biology with respiratory physiology laboratory at the University of Quebec in Montreal (UQAM). Her focus is what happens to the respiratory muscles in extreme environments and pathology. She developed an assessment, a training program and tested a new telemedicine device for a mission with XP-Antarctik, she was on expedition during 41 days and hope to have the opportunity and the privilege to return to Antarctica to continue research on human adaptation in extreme environment.
