

# **Dr. Brian Walsh**

NASA Goddard Space Flight Center

Dr. Walsh is a researcher in the Space Weather Lab at the NASA Goddard Space Flight Center in Greenbelt, Maryland. He received a PhD from Boston University in 2012 before moving to NASA Goddard.

His research focuses on observations and modeling of the interaction of the solar wind with planetary magnetospheres. He is also involved in instrument development for the purpose of creating new techniques to image the Earth's magnetosphere through soft X-rays.
